

AI Based Career Guidance

Six Thinking Hats & Project Summary

Group Ideas

- - AI-based career guidance system
- - Quizzes to identify interests and skills
- - Career suggestion charts
- - Motivational videos & success stories
- - Chatbot / counselor support
- - Career comparison features
- - Mobile-friendly app or website
- - Progress tracking system

Red Hat (Feelings)

- - Students feel lost and stressed choosing careers
- - Fear of making wrong choices
- - Lack of confidence due to unknown strengths
- - System can make them feel supported and motivated
- - Gives relief

Black Hat (Risks)

- - Wrong suggestions if data is inaccurate
- - Students may depend too much on system
- - Some may not take results seriously
- - May not consider changing goals
- - Technical issues may occur

Yellow Hat (Benefits)

- - Helps students choose right career
- - Reduces stress and confusion
- - Builds confidence
- - Saves time with clear guidance
- - Better communication with teachers & parents

Green Hat (Ideas)

- - Personalized AI suggestions
- - Skill and interest quizzes
- - Virtual career simulations
- - Motivational content
- - Chat support feature

Blue Hat (Process)

- - Research student needs
- - Design main features
- - Collect data via quizzes
- - Test prototype
- - Improve and launch

Final Summary

- Our group found that students are stressed while choosing careers.
- We designed an AI-based system to guide them.
- Next steps: build, test, and improve the system.
